

e-G@S[®] LPG CONVERSION KIT LAUNCHED IN UK

"Fantastic and easy to calibrate", "This is the kit that the market has been waiting for", "Wish we'd had this equipment years ago".

Just some of the comments we have received following the launch of what we feel is the best and easiest kit to fit and set up on the market today. This kit is backed up by an industry leading 24 month Warranty.

This kit is designed "by installers for installers" using the proven Matrix Injector Rail, you can download a demonstration of the set up software at www.e-gasweb.co.uk.

TANKS NOW AVAILABLE

We now import ATRAMA TANKS ranging from 40 litre to 150 litre cylinders and 45 litre to 92 litre toroidal tanks. ATRAMA tanks are approved to regulation UN ECE R67.01. Alongside Stako and ATRAMA we will also be selling Step tanks which are Teflon coated — NO RUST! Please do not hesitate to contact us for advice on choosing the right size and style of tank.

Designed in 1941 for use in WW2, this Fuel Catalyst comes in pellet form, that when introduced into the LPG tank reacts with the fuel. We now stock the only valve saver on the market that does not increase hydrocarbons and reduces emissions. It also has the added extra of decrease in fuel consumption. The benefits are immense so call today to order your Broquet Fuel Treatment Catalyst.
